June 7, 1984

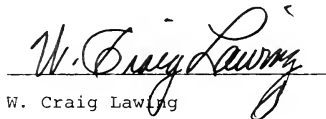

TO THE MEMBERS OF THE 1983 GENERAL ASSEMBLY (1984 SESSION):

The Legislative Research Commission herewith reports to the 1983 General Assembly, Second Regular Session 1984, on the matter of state-owned rental housing. This report is made pursuant to House Bill 1142 (1983 Session Laws, Chapter 905) of the 1983 General Assembly.

This report was prepared by the Legislative Research Commission's Committee on State-Owned Rental Housing and is transmitted by the Legislative Research Commission for your consideration.

Respectfully submitted,

Liston B. Ramsey

W. Craig Lawing

Cochairmen
Legislative Research Commission

INTRODUCTION

The Legislative Research Commission, established by Article 6B of Chapter 120 of the North Carolina General Statutes, is composed of twelve legislators who study a broad range of subjects authorized for study by the General Assembly (Membership, Appendix A). During its 1983 Session the General Assembly directed the Legislative Research Commission to study State-owned rental housing.

Senator William N. Martin was appointed as Legislative Research Commission member in charge of the study. Senator Dallas L. Alford, Jr. and Representative George W. Brannan were appointed as Cochairmen of a Committee established to study this subject. These Cochairmen served with eight other members of the Committee; Senators James H. Edwards and Ollie Harris and Representatives C. Melvin Creecy, J. Worth Gentry, Mary P. Seymour, and Edward N. Warren as well as public members Mr. Ben Aiken and Mr. T. R. Lawing (Membership, Appendix B).

Staff assistance was provided to the Committee through the Legislative Services Office. Mrs. Sue Floyd served as Committee Clerk.

House Bill 1142 is an omnibus bill which authorizes the Legislative Research Commission to study many topics, including all State-owned rental housing (Appendix C). Section 2 of House Bill 1142 (Chapter 905, 1983 Session) states:

Sec. 2. State-owned Rental Housing. (a) The Legislative Research Commission is authorized to conduct a study of all State-owned rental housing during the 1983-84 fiscal year and to recommend a comprehensive statewide rental policy, to be administered by the Department of Administration, to the 1984 Session of the General Assembly. This study shall be conducted in consultation with the department that owns the housing. In conducting this study, the Commission shall first determine the amount of nonessential rental housing currently owned by the State using the following criteria: The geographic location of the State property on which the housing is located and its proximity to alternative privately owned housing; the amount of time that would be required for employees to arrive at the State property on which housing is now located in the event of an emergency; the amount of security necessary for State property that is now being provided by State employees living in State-owned rental housing; and any other benefits to the State for the disposition of nonessential rental property by one of three means: sale of the housing and property on which it is located; sale of the housing unit only with the stipulation that the house be removed from State property; and conversion of the housing unit to an alternative use.

(b) It is the policy of the State of North Carolina that the State provide rental housing only in cases in which an essential State purpose is served. Nothing in these sections shall be construed to mean that State departments may not continue to divest themselves of nonessential rental housing during the course of the Legislative Research Commission study.

C O M M I T T E E P R O C E E D I N G S

COMMITTEE PROCEEDINGS

This report is issued as a result of a meeting of the Committee Cochairmen and LRC Member on November 7, 1983, to organize the Committee's work and two meetings of the full Committee on April 10, 1984, and May 11, 1984.

November 7, 1983 Meeting of Leadership

Because of the limited Committee budget, the Legislative Research Commission Member, Senator William N. Martin, and Cochairmen, Senator Dallas L. Alford, Jr., and Representative George W. Brannan, met to organize the work of the Committee. While meeting, they discussed the Committee's budget, authorizing legislation, work of the Joint Base Budget Subcommittee for State-owned Rental Houses which met during the 1983 Session (Subcommittee Recommendations, Appendix D) and concurrent study of many aspects of the subject being made by the Department of Administration (See 1983 Session, Chapter 761, Section 175 [Senate Bill 23], Appendix E).

In preparation for the first full Committee meeting, the staff was directed to follow the work of the Department of Administration which had been instructed to:

recommend a method for establishing statewide rental rates on the essential State-owned rental property that takes into consideration the age, construction, and condition of the housing unit; the fair market value of comparable privately owned housing units in the same locations as State-owned housing; and the benefit to the State, other than rental income, of renting to a State employee.

Additionally, the Committee developed a list of items of information to be requested from State Departments (Appendix F).

April 10, 1984 Meeting

Following the welcoming remarks of Committee Cochairmen, Ms. Christian, Committee Counsel, was recognized to review the Committee's authorizing legislation. The legislation directed the study to be made of all State-owned rental housing for the purpose of recommending a comprehensive statewide rental policy to be administered by the Department of Administration. In consultation with the Department that owns the housing, the Commission (as a result of the report from its Committee) shall recommend the disposition of nonessential rental property by one of three means: (1) sale of the housing and property on which it is located, (2) sale of the housing unit only with the stipulation that the house be removed from State property, and (3) conversion of the housing unit to an alternative use.

Ms. Beth Christensen, Fiscal Analyst for the General Assembly, provided the Committee with an overview of previous legislative study of the issue by the Appropriations Committee during the 1981 and 1983 Sessions of the General Assembly. During the 1983 Session a subcommittee representative of all of state government was appointed to review the issue. Ms. Christensen reported the subcommittee's conclusion that over 1,000 units owned by the State were rented, no uniform regulation or standard for these rentals had been established, and there should be no sales of housing units unless they could be moved from State

property. Finally, the subcommittee recommended that the Legislative Research Commission study these issues.

The Committee then heard Mr. Charles Grady, Director of the Office of State Property with the Department of Administration. He presented Committee members with copies of the Department's report which was developed in response to the charge to the Department contained in Chapter 761 of the 1983 Session Laws (Appendix G). According to Mr. Grady, the report's inventory reflected a total of 1261 rental units. The number of state employees living in these units is 786 and non-state employees total 363; while 112 units are vacant. Presently, 39 units are in the process of being sold through the bid process.

Furthermore, Mr. Grady cited his Department's recommendations. The Department maintains that state-owned rental rates should be adjusted to reflect current market conditions. Three suggested ways to achieve this result are: (1) follow the Federal Government's Department of Housing and Urban Development's "Standard Metropolitan Statistical Area Fair Market Rents" (SMSA); (2) use SMSA figures in combination with recommendations from the respective controlling agencies to establish a formula that is fair to the State and to the occupants; (3) do nothing and leave the situation as it presently exists.

Following this overview of the Department of Administration's study and recommendations, representatives of departments identified by the Department of Administration as owners of housing appeared before the Committee for consultation.

Mr. Jimmie Woodall, Director of Budget and Analysis, the Department of Human Resources, addressed rental housing owned

by his department. He indicated that some of his figures are different from those of the Department of Administration because his count is of buildings and the Department of Administration's count is of individual apartments within a building. Also, his numbers are those used in the Spring of 1983 when the Legislature was updating rent. Since that time some have been sold and a few have been vacated. He reported that the Department of Human Resources has a total of 278 different buildings available and provides over 400 housing units for state employees. Monthly rental rates range from \$42.50 to \$332.00. Since 1979, rental rates have been increased according to salary increases appropriated by the Legislature for state employees until last spring when the Legislature generated a figure of \$1.62 per square foot. For the last several years the Department of Human Resources has been phasing out rental housing by either converting units for some program-related activity or selling the structure for removal. Also, infrequently, there has been some selling of structure and land. Without clear direction, Mr. Woodall stated that they are not able to conclude what units are essential and what are nonessential. He requested specific guidelines from the Committee for formulating a recommendation to them. Finally, he responded to questions of the Committee.

As a follow-up item to the report Mr. Grady presented in the morning, he later distributed some additional information, a list of rental sites by county which were compiled from the report he discussed earlier. In response to questions from Committee members, he identified several specific units (Appendix H).

Committee Counsel was directed to reiterate the charge to the Legislative Research Commission that it recommend a state-wide rental policy to be administered by the Department of Administration. Ms. Christian emphasized that the Committee must rely upon the respective department's determination of nonessential housing in order that it might make its report to the Commission.

Senator Alford recognized Mr. Maurice Weaver, Budget Officer, Department of Agriculture, who stated that someone from each division within his department would report on their specific housing. Mr. Pat Kelly, Director of Research Stations Division spoke first and stated that they determined essential rental housing units as those required for the benefit of the program. They are provided to employees who are required to be on station at no charge. The number of dwellings considered to be essential is 47; nonessential is 33. They are in the process of phasing out those nonessential dwellings by putting them to other use or by selling them. The Committee adopted this recommendation.

Mr. Earl Bell, Manager of State Farms reported that his division has one essential rental housing unit and 18 nonessential. He further recommended that the nonessential be sold for removal from the property. The Committee voted to adopt this recommendation.

Mr. Sam Rand, Manager of the State Fair, reported having three units--one essential unit occupied by the caretaker, one nonessential unit occupied by a maintenance person, and one used for a maintenance office. Mr. Aiken moved for acceptance

of one essential housing unit and for redesignating one unit allowing the maintenance person until January 1985 to relocate. This motion was adopted by the Committee.

Mr. Tom King of the Department of Community Colleges reported that his Department owns no housing.

Mr. Rip Ryon, Deputy Secretary for the Department of Correction, reported 30 rental housing units as being essential and requested an extension of time to prepare an accurate report. The Committee requested that Mr. Ryon verify his findings and furnish a report to the Committee's legal counsel for processing prior to the next meeting.

Mr. Richard Sawyer, Administrator of Historic Sites Section, Department of Cultural Resources, reported having ten rental housing units--eight essential, one in an historic area, and one in the process of being eliminated. The Committee voted to accept this report.

Mr. Alan Waters, the University of North Carolina's Assistant to the Vice President for Finance, was recognized to report on higher education. Realizing that Mr. Waters had not had sufficient notification to prepare a report, the Committee granted him additional time to prepare his report. Mr. Waters made three suggestions to the Committee: (1) do not classify University presidents' and chancellors' housing as rental units, (2) give special consideration to married student, resident manager, and faculty housing, and (3) do not use the statistics included in the Department of Administration's report for declaration of essential and nonessential housing in his department. The Committee requested more-detailed information but adopted the

proposal that chancellors' and presidents' housing not be considered rental property.

Ms. Ann Griffith, the Department of Natural Resources and Community Development, reported that Forestry has 41 rental units and of this number 13 are nonessential. Parks has 53 essential units. Senator Harris moved to accept the report. Representative Warren seconded the motion which carried.

Mr. David Hayes, Assistant Secretary for Management, the Department of Transportation, reported that his department has no rental housing. Occasionally one is purchased in an advance right-of-way acquisition and is rented until it is removed through the process. Representative Warren moved to accept this report, seconded by Representative Brennan. The motion carried.

Senator Alford requested that Mr. Woodall include in his forthcoming report the numbers of essential and nonessential state-owned rental units.

Committee Counsel outlined the time schedule the Committee will be working within in order to comply with Legislative Research Commission's instructions. The Committee leadership recognized the need for additional reporting time and set the next meeting for May 11, 1984.

May 11, 1984 Meeting

The Committee held its final meeting on May 11, 1984 to consider its proposed report to the Legislative Research Commission.

Committee Counsel reviewed the draft Committee Report while indicating that a synopsis of the meeting would be included in the section entitled "Committee Proceedings." She also noted that the designation of nonessential housing units, as approved by the Committee, would be included in the section entitled "Recommendations" along with the approved disposition of non-essential units.

The Committee's receipt of reports from departments owning rental housing began as the Committee commenced its review. Although the departments had produced oral reports at an earlier meeting and subsequently provided written statements reflecting their designation of nonessential rental housing (Appendix J), the Committee recognized the need for a final statement from most of the departments appearing earlier to reconcile earlier statements or to provide additional information.

Mr. T. S. Ryon, Department of Correction, explained the need to have employees available at the various units owned by his Department. He stated that his Department has 36 essential housing units and no nonessential units. The Committee accepted his report.

Mr. Richard Sawyer, Department of Cultural Resources, reported that his Department owned ten housing units at historic sites; nine essential and one nonessential. He further informed the Committee that one is to be removed from the site. Mr. Sawyer stressed the essential feature of security offered by having someone living at these historic sites. The Committee voted to accept this report.

Mr. Maurice Weaver, Department of Agriculture, listed the housing units owned by his Department as follows:

State Farms - 19 nonessential units to be sold for removal
 1 nonessential unit to be converted to other use

Research Stations - 27 nonessential units to be sold for removal
 59 essential units

State Fair - 1 nonessential unit to be converted to other use
 1 essential unit

TOTALS - 60 essential units
 2 nonessential units to be converted to other use
 46 nonessential units to be sold for removal

108 units

The Committee accepted this report.

The Committee then requested that as many departments as time will permit provide a listing of rental housing units with descriptions by locations and include such listing in the Committee's files.

Mr. Jim Woodall, Department of Human Resources, reported that his Department owned a total of 278 rental housing units. Of these, 117 are essential and 161 are nonessential. The Committee directed the Department of Human Resources to furnish actual figures and recommendations for disposal of nonessential units by (1) converting them to other uses, (2) selling the structures for removal from property, or (3) selling the units and property. The Committee directed Counsel to include these figures in the Committee recommendations to the Legislative Research Commission. (See Appendix L.)

Ms. Ann Griffith, the Department of Natural Resources and Community Development, reported that her Department owns the following:

Parks Division - 53 essential units

Forestry Division - 39 essential units

2 nonessential units to be sold for removal

TOTALS - 92 essential units

2 nonessential units to be sold for removal

94 units

Following a motion for acceptance, this report was adopted.

Mr. Alan Waters, the University of North Carolina, reported ownership of 417 units--415 essential and 2 nonessential to be sold (both housing unit and property). (In light of the fact that the nonessential property was an endowment purchase and no money will exchange hands, it was clarified that this sale will have no effect on the General Fund.) The Committee accepted this report.

Mr. Charles Holliday, Acting Director of the Department of Administration, reported ownership of two essential housing units--the Governor's Mansion and the Western Governor's Mansion. This report was approved by the Committee.

Ms. Ann Christian, Legislative Counsel, asked the Department of Administration's representatives if there were any additional Departments owning property and was informed that the Committee had received a report from all departments in their files (Appendix I).

Mr. Jim Johnson, Legislative Research Commission staff member who has previously worked with the committees and departments studying the issue of State-owned rental housing, offered to answer any questions posed by the Committee.

Ms. Ann Christian reviewed legislation charging this Committee with its study. In response, the Committee discussed the issue of whether or not this Committee should raise rental rates. Mr. Johnson responded that establishing a uniform policy for setting rental rates would be responsive to the Committee's charge.

Then Committee Counsel distributed copies of "PROPOSED RECOMMENDATION--RENTAL RATES". Incorporating suggestions of Senator Harris into his motion, Mr. Aiken moved that the following recommendation concerning rental rates be included in the Committee's report to the Legislative Research Commission:

The Department of Administration shall set rental rates and determine maintenance policies for all State-owned rental housing on an annual basis and in consultation with the departments owning the rental housing. In the event of any disagreement with the decision of the Department of Administration regarding rental rates and maintenance, the department that is affected by the decision shall have the right of appeal to the Governor or Council of State pursuant to G. S. 146-31. Rental rates shall be based on factors such as the type of housing, condition of the unit, number of bedrooms, and location of the housing as well as the job requirements and the housing needs of the person domiciled there.

The Committee adopted this recommendation with the instruction that Legislative Counsel would refine the wording as necessary. Mr. Holliday offered his Department's support of this policy.

The Committee, by motion, directed Legislative Counsel to incorporate the departmental reports, as approved, and the forthcoming itemization from the Department of Correction into the Committee's report to the Legislative Research Commission (Appendix M).

Once Committee Recommendations were approved, Counsel then distributed copies of proposed legislation entitled "AN ACT TO DIVEST STATE DEPARTMENTS OF NONESSENTIAL STATE-OWNED RENTAL HOUSING." Consideration was given to incorporating the Committee's policy on rental rates into this legislation, but the Committee concluded that further response from the respective departments would be required prior to amending this legislation. The Committee then adopted the legislation as originally proposed but with an additional sentence setting forth the methods of property disposition.

Representative Brannan and Senator Alford expressed their appreciation to the Committee Members, staff members, and State departments for their diligent efforts and concluded the Committee's work with the adoption of the report.

F I N D I N G S

FINDINGS

1. Although the number of rental units and their associated rents and maintenance costs are constantly changing, the Department of Administration indicates that the State owns approximately 1200 rental housing units. The number of State employees domiciled in these units is 786 or 63%. Non-State domiciliaries number 363 or 29%. This leaves 112 vacancies or 8% of the total number of rental units.

2. Although the General Assembly generated a figure of \$1.62 per square foot rental rate, no standard rental policy or uniform rental rate schedule exists among the various departments. Furthermore, the rental rates and when and how they are set varies widely. Each State department and institution establishes its own policies and sets rents based on factors such as the type of housing, condition of the unit, number of bedrooms, location of the housing and the job requirements of the person domiciled there.

3. Some features are standard to the rental agreements of all departments. They include: (1) utilities paid by the tenant; (2) homeowners insurance or insurance on personal contents is paid by the tenant; (3) fire insurance is covered under the general fire insurance policy through the Department of Insurance for all State-owned facilities; and (4) general repairs and maintenance are handled by the individual departments.

4. The Office of State Personnel very rarely, if ever,

factors housing benefits into the compensation of State employees.

5. Benefits to the State for owning and maintaining rental housing exists in some special circumstances; for instance: (1) if staffing levels are less than adequate and there is a true need for off-duty employees to be nearby in the event of an emergency; (2) pay levels for certain job classifications are too low and the benefit of low-cost housing partially offsets the less competitive wage the State has to offer; (3) sometimes houseparents that lived in the dorms occupied by students are the only staff available to supervise children at night; (4) the security provided by the personnel living on the premises is significantly more valuable than the cost to the State for the housing; (5) the livestock and dairy animals on farm research stations require attention daily, often during non-work hours, and it is essential that employees live on the premises.

R E C O M M E N D A T I O N S

RECOMMENDATIONS

The Legislative Research Commission's Study Committee on State-owned Rental Housing, upon consultation with the department which owns the housing, has conducted a study to first determine the amount of nonessential rental housing currently owned by the State using the following criteria: The geographic location of the State property on which the housing is located and its proximity to alternative privately owned housing; the amount of time that would be required for employees to arrive at the State property on which housing is now located in the event of an emergency; the amount of security necessary for State property that is now being provided by State employees living in State-owned rental housing; and any other benefits to the State for employees to occupy said housing.

1. Based upon the identification of nonessential State-owned rental housing by each department that owns the housing, the Legislative Research Commission's Study Committee on State-owned Rental Housing recommends the sale of the housing and the property on which it is located of the following properties:
 - A. University of North Carolina.....2
 - TOTAL.....2

2. Based upon the identification of nonessential State-owned rental housing by each department that owns the housing, the Legislative Research Commission's Study Committee on State-owned Rental Housing recommends the sale of the following housing units only with the stipulation that the house be removed from State property:

A. Department of Agriculture.....	46*
B. Department of Cultural Resources....	1
C. Department of Human Resources.....	122
D. Department of Natural Resources and Community Development.....	<u>2</u>
TOTAL.....	171

3. Based upon the identification of nonessential State-owned rental housing by each department that owns the housing, the Legislative Research Commission's Study Committee on State-owned Rental Housing recommends the conversion of the following housing units to an alternative use:

A. Department of Agriculture.....	2*
B. Department of Human Resources.....	<u>39</u>
TOTAL.....	41

*See Appendix K for update of Department of Agriculture nonessential designations.

4. Recognizing that it is the policy of the State of North Carolina that the State provide rental housing only in cases in which an essential State purpose is served, the Legislative Research Commission's Study Committee on State-owned Rental Housing recommends the departments regularly review their inventory of rental housing, using the criteria adopted by the Legislative Research Commission to determine nonessential rental housing, and continue to divest themselves of nonessential rental housing.

5. The Department of Administration shall set rental rates and determine maintenance policies for all State-owned rental housing on an annual basis and in consultation with the departments owning the rental housing. In the event of any disagreement with the decision of the Department of Administration regarding rental rates and maintenance, the department that is affected by the decision shall have the right of appeal to the Governor or Council of State pursuant to G.S. 146-31. Rental rates shall be based on factors such as the type of housing, condition of the unit, number of bedrooms, and location of the housing as well as the job requirements and the housing needs of the person domiciled there.

R E C O M M E N D E D L E G I S L A T I O N

A BILL TO BE ENTITLED

AN ACT TO DIVEST STATE DEPARTMENTS OF NONESSENTIAL STATE-OWNED RENTAL HOUSING.

The General Assembly of North Carolina enacts:

Section 1. It is the policy of the State of North Carolina that the State provide rental housing only in cases in which an essential State purpose is served.

Sec. 2. All State-owned rental property must be designated essential or the State department owning the property must divest itself of the property. In making the determination that the property is essential, the State department shall first determine the amount of nonessential rental housing that is currently owned by the State using the following criteria: The geographic location of the State property on which the housing is located and its proximity to alternative privately owned housing; the amount of time that would be required for employees to arrive at the State property on which housing is now located in the event of an emergency; the amount of security necessary for State property that is now being provided by State employees living in State-owned rental housing; and any other benefits to the State for employees to occupy said housing. Each Department shall recommend disposal of its property by one of three means: (1) sale of the housing and property on which it is located; (2) sale of the housing unit only with the stipulation that the house be removed from State property; and (3) conversion of the housing unit to an alternative use. The Department of Administration shall then dispose of this nonessential State-owned rental housing

pursuant to the approval of the Council of State and the procedures set forth in Chapter 146 of the North Carolina General Statutes.

Sec. 3. This act shall become effective upon ratification.

GENERAL ASSEMBLY OF NORTH CAROLINA

SESSION 1983

RATIFIED BILL

CHAPTER 905 HOUSE BILL 1142

AN ACT AUTHORIZING STUDIES BY THE LEGISLATIVE RESEARCH COMMISSION AND BY THE COMMISSION ON CHILDREN WITH SPECIAL NEEDS AND MAKING TECHNICAL AMENDMENTS RELATING THERETO.

The General Assembly of North Carolina enacts:

Section 1. The Legislative Research Commission may study the topics listed below. Listed with each topic is the 1983 bill or resolution that originally proposed the study and the name of the sponsor. The Commission may consider the original bill or resolution in determining the nature, scope and aspects of the study. The topics are:

- (1) Continuation of the Study of Revenue Laws (H.J.R. 16 - Lilley); and the ramifications, if enacted, of H.B. 746, Appraisal of Subdivided Tract (Auman) and H.B. 1250, No Intangible Tax/Income Surtax (Auman),
- (2) Continuation of the Study on the Problems of the Aging (H.J.R. 44 - Economos; S.J.R. 16 - Gray),
- (3) Continuation of the Study on Insurance Regulation (H.B. 63 - Seymour) and Insurance Laws and Regulation of Insurance Industry (H.B. 1243 - Hightower),
- (4) Teaching of Computer Literacy in the Public Schools and Community Colleges (H.J.R. 191 - Berry) and the Continuation of Study of College Science Equipment (H.J.R. 898 - Enloe),
- (5) Adequacy of State Management of Large-Scale Land Clearing and Peat Mining (H.J.R. 220 - Evans),
- (6) Adequacy of Existing Water Pollution Control Programs to Improve and Protect Water Quality in the State (H.J.R. 232 - Evans),
- (7) Marketing of Seafood by Fishermen (H.J.R. 896 - Chapin),
- (8) Continuation of Study on the Economic Social and Legal Problems and Needs of Women (H.J.R. 904 - Easterling; S.J.R. 329 - Marvin),
- (9) Regulation of Nonpublic and Public Post-Secondary Educational Institutions (Joint Resolution 33 (H.J.R. 988 - Thomas)),
- (10) Readable Insurance Policies (H.B. 1069 - Ballance),
- (11) State Government Risk Management (H.J.R. 1083 - Seymour),
- (12) Biotechnology Development (H.B. 1122 - Etheridge, Bobby and H.J.R. 1282 - Etheridge, Bobby; S.J.R. 620 - Hancock),
- (13) Continuation of Study of the State's Interest in Railroad Property (H.B. 1142 - Hunt),
- (14) Restricting Driving by Minors (H.J.R. 1149 - J. Jordan),

- (15) Health Professionals (H.J.R. 1194 - Diamont),
- (16) Water Quality in Haw River and B. Everett Jordan Reservoir (H.J.R. 1257 - Hackney),
- (17) Regulation of Alcoholic Beverages on State Property (H.J.R. 1292 - Clark),
- (18) Disposition of Animals by Animal Shelters and Pounds (H.J.R. 1309 - Stamey),
- (19) Boards, Commissions, and Councils in the Executive Branch (H.J.R. 1321 - Hunt),
- (20) Feasibility of a Food Distribution Facility on Dix Farm Property in Raleigh (H.J.R. 1334 - James),
- (21) Implementation of Identification and Labelling of Toxic or Hazardous Substances as Proposed by House Bill 1339 (Payne),
- (22) Water Resources Issues Involving North Carolina and Virginia (H.J.R. 1404 - Church),
- (23) Investment Guidelines for Eleemosynary Institutions and Funds (H.J.R. 1423 - Musselwhite),
- (24) Child Support Collection Procedures (H.J.R. 1439 - Easterling; S.J.R. 675 - Woodard, W.),
- (25) Contamination of Unpackaged Foods (H.J.R. 1441 - Stamey),
- (26) Legislative Communications Confidentiality (H.R. 1461 - Miller),
- (27) Continuation of the Study of Information Processing Resources in State Government (S.J.R. 44 - Alford),
- (28) Regulation and Taxation of Banks, Savings and Loans and Credit Unions (S.J.R. 381 - Edwards of Caldwell),
- (29) District Attorney Standards (S.B. 496 - Hipps),
- (30) Cost of Providing Attorneys and Guardians Ad Litem to Indigents (S.J.R. 643 - Swain),
- (31) Public Health Facility Laws (S.J.R. 656 - Hancock), and Review of Certificate of Need Procedures (H.J.R. 1294 - Economos),
- (32) Life Care Arrangements (S.J.R. 657 - Hancock),
- (33) Worthless Checks (S.J.R. 661 - Thomas of Henderson),
- (34) State-owned Rental Housing as contained in Section 2 of this act,
- (35) User Fees at State-owned Facilities, as contained in Section 3 of this act,
- (36) Motorboat Titles and Liability Insurance, as contained in Section 4 of this act,
- (37) Motor Vehicle Inspection Program, as contained in Section 5 of this act,
- (38) Continuation of the Study of Day Care (H.J.R. 594 - Colton),
- (39) Continuation of the Study on Twelfth Grade (H.J.R. 753 - Mauney; S.J.R. 343 - Tally),

- (41) Solar Law (S.J.R. 670 - Walker),

- (42) Statutory Liens (S.J.R. 680 - Edwards of Caldwell),
- (43) In-service Training of Teachers in North Carolina History, the American Economic System, Free Enterprise Concepts, and Legal Topics (H.B. 1281 - Foster).

Sec. 2. State-owned Rental Housing. (a) The Legislative Research Commission is authorized to conduct a study of all State-owned rental housing during the 1983-84 fiscal year and to recommend a comprehensive statewide rental policy, to be administered by the Department of Administration, to the 1984 Session of the General Assembly. This study shall be conducted in consultation with the department that owns the housing. In conducting this study, the Commission shall first determine the amount of nonessential rental housing currently owned by the State using the following criteria: The geographic location of the State property on which the housing is located and its proximity to alternative privately owned housing; the amount of time that would be required for employees to arrive at the State property on which housing is now located in the event of an emergency; the amount of security necessary for State property that is now being provided by State employees living in State-owned rental housing; and any other benefits to the State for employees to occupy said housing. The Commission shall recommend the disposition of nonessential rental property by one of three means: sale of the housing and property on which it is located; sale of the housing unit only with the stipulation that the house be removed from State property; and conversion of the housing unit to an alternative use.

(b) It is the policy of the State of North Carolina that the State provide rental housing only in cases in which an essential State purpose is served. Nothing in these sections shall be construed to mean that State departments may not continue to divest themselves of nonessential rental housing during the course of the Legislative Research Commission study.

Sec. 3. User Fees. The Legislative Research Commission is authorized to study the potential for user charges and admission fees at State-owned cultural, recreational and historical facilities. The study may cover museums, historic sites, marine resource centers as well as other facilities. The Legislative Research Commission may make an interim report to the 1984 Regular Session of the 1983 General Assembly and may make a final report to the 1985 General Assembly.

Sec. 4. Motorboat Titles and Liability Insurance. The Legislative Research Commission of the General Assembly is authorized to study the issue of motorboat titles and liability insurance. The study may include start-up and administrative costs, potential revenues, phase-in plans, financial institution requirements, etc. The Commission may report to the 1984 Session.

Sec. 5. Motor Vehicle Inspection Program Study. The Legislative Research Commission may study the effectiveness of the motor vehicle inspection program required by Article 3A of Chapter 20 of the General Statutes. The study may consider, among other aspects, the impact on highway safety, cost

effectiveness of the program, and probable impact of eliminating part or all of the program.

Sec. 6. For each of the topics the Legislative Research Commission decides to study, the Commission may report its findings, together with any recommended legislation, to the 1984 Session of the General Assembly or to the 1985 General Assembly, or the Commission may make an interim report to the 1984 Session and a final report to the 1985 General Assembly.

Sec. 7. G.S. 120-30.17 is amended by adding two new subsections to read:

"(7) to obtain information and data from all State officers, agents, agencies and departments, while in discharge of its duty, pursuant to the provisions of G.S. 120-19 as if it were a committee of the General Assembly.

(8) to call witnesses and compel testimony relevant to any matter properly before the Commission or any of its committees. The provisions of G.S. 120-19.1 through G.S. 120-19.4 shall apply to the proceedings of the Commission and its committees as if each were a joint committee of the General Assembly. In addition to the other signatures required for the issuance of a subpoena under this subsection, the subpoena shall also be signed by the members of the Commission or of its committee who vote for the issuance of the subpoena."

Sec. 8. Section 1 of Chapter 1372, Session Laws of 1981, is amended by deleting "as authorized in Section 2 of Resolution 61, Session Laws of 1981".

Sec. 9. Section 1(3) of Chapter 1372, Session Laws of 1981, is amended by deleting "1983 Session", and inserting in lieu thereof "1983 and 1985 Sessions".

Sec. 10. G.S. 124-5 is amended by deleting "June 1, 1983", and inserting in lieu thereof "the date of convening of the 1985 Regular Session of the General Assembly".

Sec. 11. The last sentence of G.S. 124-5 is amended by deleting "11-month period", and inserting in lieu thereof "period ending on convening of the 1985 Regular Session."

Sec. 12. Deaf/Blind School Move--Commission on Children with Special Needs. (a) The Commission on Children with Special Needs, established by Article 12 of Chapter 120 of the General Statutes, may study the issue of transferring the State schools for the Deaf and the Governor Morehead School for the Blind to the jurisdiction of the State Board of Education.

(b) The Commission may make a final report to the Second Session of the 1983 General Assembly. (H.J.R. 246 - Fenner)

Sec. 13. Bills and Resolution References. The listing of the original bill or resolution in this act is for references purposes only and shall not be deemed to have incorporated by reference any of the substantive provisions contained in the original bill or resolution.

Sec. 14. This act is effective upon ratification.
In the General Assembly read three times and ratified,
this the 21st day of July, 1983.

James C. Green
President of the Senate

LISTON B. RAMSEY

Liston B. Ramsey
Speaker of the House of Representatives

Joint Base Budget Subcommittee
on
State-Owned Housing

Membership:

Representative Vernon James, Chrm.
Representative Jo Foster
Representative Dan Devane

Senator Cass Ballenger
Senator Dennis Winner

Purpose:

To review rental charges made in the various departments for state-owned housing and to develop a statewide policy and rate schedule for rental of housing to state employees.

Findings:

- A. The State rents approximately 1,000 units throughout the state. These rental units are owned by the Departments of Agriculture, Cultural Resources, Human Resources and Natural Resources and Community Development; the sixteen constituent institutions of the University; and the Wildlife Resources Commission.
- B. No standard rental policy or uniform rental rate schedule exists among the various departments. In fact, rental rates and when and how they are changed varies widely. Each state department and institution establishes its own policies and sets rents based on a number of factors, including type of housing, condition of the unit, number of bedrooms, accessibility to a town, job requirements, etc.
- C. Standard among all the departments were:
 - (1) The utilities are paid by the tenant.
 - (2) Homeowners insurance or insurance on personal contents is paid by the tenant.
 - (3) Fire insurance is covered under the general fire insurance policy through the Department of Insurance for all state-owned facilities.
 - (4) General repairs and maintenance are handled by the individual departments.
- D. In most cases, it would not be practical to sell the housing unit unless it was moved to another location.

Recommendations:

After reviewing data submitted to us by the departments, our subcommittee feels that a uniform statewide policy governing rental agreements and rates charged is needed. However, it is impossible for us to look at each individual department's rental units and the related rates charged, lease agreements, and other pertinent data needed to develop such policies within the time allowed for our subcommittee's work. Moreover, since some departments have recently increased rents and others have not, an interim recommendation to increase rent by a percentage across-the-board, until a study could be made, would be unfair.

Therefore our subcommittee recommends that:

- A. The Legislative Research Commission conduct a study of all state-owned housing and make recommendations to include (1) the amount of non-essential rental housing currently owned by the state, (2) alternative uses of non-essential rental housing, (3) the method of disposition of non-essential rental housing that could not be used for other purposes, and (4) the method for establishing statewide rental rates.
- B. The State Property Office of the Department of Administration coordinate with the various departments in gathering the data necessary for the Commission's deliberations.

GENERAL ASSEMBLY OF NORTH CAROLINA
SESSION 1983
RATIFIED BILL
CHAPTER 761

SENATE BILL 23

AN ACT TO MAKE APPROPRIATIONS FOR CURRENT OPERATIONS OF STATE DEPARTMENTS, INSTITUTIONS, AND AGENCIES, AND FOR OTHER PURPOSES.

The General Assembly of North Carolina enacts:

Section 1. The appropriations made herein are for maximum amounts necessary to provide the services and accomplish the purposes described in the budget. Savings shall be effected where the total amounts appropriated are not required to perform these services and accomplish these purposes and, except as allowed by the Executive Budget Act, or as hereinafter provided, the savings shall revert to the appropriate fund at the end of the biennium.

An outline of the provisions of the act follows this section. The outline shows the heading "-----CONTENTS/INDEX-----" and it lists by general category the descriptive captions for the various sections and groups of sections that make up the act.

-----CONTENTS/INDEX-----

(This outline is designed for reference only, and it in no way limits, defines, or prescribes the scope or application of the text of the act.)

PART I.-----CURRENT OPERATIONS/GENERAL FUND

Sec. 2.

PART II.-----CURRENT OPERATIONS/HIGHWAY FUND

Sec. 3.

PART III.-----APPROPRIATION OF FEDERAL BLOCK GRANT FUNDS

-----OIL RE-REFINING FACILITY

Sec. 172. The General Assembly urges the Department of Administration to sell the oil re-refining facility. The General Assembly finds that the State has initiated this innovative technology and should now turn it over to private enterprise.

-----COMMUTING POLICY

Sec. 173. G.S. 143-348(8)i.7a. is amended by rewriting the first sentence of the third paragraph to read:

"Every individual who uses a State-owned passenger motor vehicle, pick-up truck, or van to drive between his official work station and his home, shall reimburse the State for these trips at the current motor pool rate established by the Department of Administration."

Sec. 174. The last sentence of the third paragraph of G.S. 143-348(8)i.7a. is amended by deleting "every 60 days" and inserting in lieu thereof "every 90 days".

Sec. 174.1. (a) Section 61, Chapter 1282, Session Laws of 1981 (Regular Session, 1982) is amended by deleting "1982-83 fiscal year", and inserting in lieu thereof "1983-85 biennium".

(b) This section is effective July 1, 1983.

-----STATE-OWNED RENTAL HOUSING

Sec. 175. (a) The Department of Administration shall recommend a method for establishing statewide rental rates on the essential State-owned rental property that takes into consideration the age, construction, and condition of the housing unit; the fair market value of comparable privately owned housing units in the same locations as State-owned housing; and the

benefit to the State, other than rental income, of renting to a State employee.

The Department shall submit its report to the Speaker of the House and the Lieutenant Governor no later than April 1, 1984.

(b) It is the policy of the State of North Carolina that the State provide rental housing only in cases in which an essential State purpose is served. State departments may continue to divest themselves of nonessential rental housing prior to the Department of Administration's recommendation or during any other authorized study.

PART XX-----OFFICE OF THE GOVERNOR

-----NEED BASED STUDENT LOANS

Sec. 176. G.S. 143-47.21 is amended by deleting "Medical Student Loans" and inserting in lieu thereof "Student Loans".

Sec. 177. G.S. 143-47.21 is further amended by adding immediately after the word "professionals" the words ", or leading to graduation as mathematicians or scientists".

Sec. 178. The catch line to Article 2D of Chapter 143 of the General Statutes is amended by deleting the word "Medical".

Sec. 179. G.S. 120-123(33a) is amended by deleting the word "Medical".

Sec. 180. G.S. 143-47.24 is amended in the first paragraph by adding new sentences to read: "The loans administered pursuant to this Article shall be repaid in a manner

APPENDIX F

ITEMS OF INFORMATION TO BE REQUESTED FROM STATE DEPARTMENTS:

1. List State-owned properties by category of use.
2. Describe how the property is used (include extent of use).
3. Explain if this property is essential to the efficient and effective operation of the department and why.
4. Would an alternate use be of more benefit to the State?
5. If the property is not essential to the operation of the department, does the State otherwise substantially benefit from its continued use as a unit of rental?
6. What is the actual cost to the State resulting from maintenance, utilities, security, etc. (include deficit if rental rate is below fair market value)?
7. Describe the benefits and liabilities of having a tenant (or user) cover at least the actual cost of this property to the State.
8. Please provide any comments you have in terms of recommended policy implications.

North Carolina
Department of Administration
116 West Jones Street
Raleigh 27611

James B. Hunt, Jr. Governor
Jane Smith Patterson, Secretary

State Property Office
Charles E. Grady, Jr., Director
(919) 733-4346

March 30, 1984

Senator Dallas L. Alford, Jr.
Representative George W. Brannan
Legislative Office Building
300 North Salisbury Street
Raleigh, North Carolina

Dear Senator Alford and Representative Brannan:

As requested by the 1983 Session Laws, the State Property Office has prepared the following data concerning State-owned rental housing. Two extensive questionnaires to every involved agency were sent out during November and December of 1983. These completed questionnaires have produced the following data which is summarized herein.

Rental housing is defined as a building or space in a building that is maintained by the State for use as housing by employee or non-employee, or is vacant but normally maintained for housing. There may or may not be rent charged. In some cases a rent-free or a reduced rent is charged as a concession for work performed. Examples would be student residence hall advisors on reduced dorm fees or chancellors living rent-free in a home provided for them on a State supported campus. Normal dorm space to students is not considered in this study as they are reportedly self-supporting through student fees State-wide.

It must be kept in mind that the number of rental units and their associated rents and maintenance cost are constantly changing. At the date of this report, the total number of rental units is considered to be 1261. The number of State employees domiciled in this 1261 is 786 or 63%. Non-State employees total 363 with 112 vacancies, 29% and 8% respectively.

Of the 1261 total units, 39 are in the process of being sold or in some way permanently removed from the rental housing categorization.

According to information from the questionnaires, 47% or 589 State employees out of the total 1261 could live off-site in non-state supported private housing. Out of this 589, 16% or 97 are presently vacant. These 589 personnel are considered non-essential on-site employees: they could perform their employment tasks just as well living elsewhere.

The departments with the greatest number of non-essential on-site employee housing, according to the questionnaire, are Human Resources and Higher Education, with 420 and 421 respective positive answers. Following is a total list by Department of non-essential on-site housing units. Presently there are 97 of these non-essential units vacant.

<u>Department</u>	<u>Number of Non-essential Units</u>
Higher Education	421
Human Resources	420
Corrections	35
NRCD	33
Agriculture	15
Administration	2
Cultural Resources	1

Of the total number of State employees domiciled (786) 146 of these have rents that are directly related to their salary by their various departments and by various methods of computations. 622 State employees' rents out of the 786 are not related to salary in any way. The remaining 18 employees are considered unknown. Either the questionnaire responder was unaware of the relationship or failed to answer the question.

In preparing this report and final rental housing computer printout, each rental unit is placed in one of five dollar amount categories. These five categories are as follows: \$0-20, \$21-40, \$41-50, \$51-99, \$100+. The breakdown in these categories can be summarized as follows:

Rent Charged:	<u>\$0-20</u>	<u>\$21-40</u>	<u>\$41-50</u>	<u>\$51-99</u>	<u>\$100+</u>
Employee	162	99	81	139	299
Non-Employee	20	0	0	6	97 337
Vacancies	15	39	47	8	1

In many cases utilities are included within these rent charges. In 358 rental units, the main source of heat is included in rent. In 903 units it is not. In 1,005 units water is included in the rent. In 256 it is paid separately by the renter.

Using the five categories the breakdown of the main source of heat being included in rental charge is as follows:

Rent Charged:	<u>\$0-20</u>	<u>\$21-40</u>	<u>\$41-50</u>	<u>\$51-99</u>	<u>\$100+</u>
Employee	58	11	0	16	26
Non-Employee	0	0	0	1	246
Vacancies	0	0	0	0	0

During December, a second questionnaire was sent out to all Department Heads seeking actual cost to the State of each rental unit. In many cases, due to collective accounting methods, these costs are difficult to secure. The following summary, however, is presented as a best estimate of cost. Dorms and resident advisors were not included in this second survey. Since the first questionnaire was received many rental units have been changed to other uses. Of the total number of rental units, 241 are actually losing money, 111 are breaking even, and 344 have positive cash flow. A more detailed exhibit exists showing costs by complex and asset number following this narrative.

If the State-owned rental rates are to be adjusted to reflect current market conditions, we feel that two good alternatives exist. First, the Federal Government's Department of Housing and Urban Development's "Standard Metropolitan Statistical Area Fair Market Rents", published normally every year, should be used. These SMSA figures are reportedly accurate and reflect the economic conditions and current monthly rental rates including utilities in each North Carolina county. These rates are based on the 45th percentile of local rental rates. New housing and public housing rates are eliminated from the statistics. Fifty-five percent of the renters in each area pay above the SMSA rates and forty-five percent pay below. We feel these Federal figures to be accurate and would be an excellent method of bringing our own State-owned rental housing rates into a more current posture. It must be kept in mind that if SMSA figures are used, any State-owned sub-standard housing would have to be brought up to current rentable conditions.

A second alternative exists by using SMSA figures in conjunction with suggestions and comments from the controlling agencies. These Agency suggestions could include comments on location, condition, amenities, necessity of personnel in remote areas, over-adequacy or even the desirability of keeping the unit as rental housing. The rates then could be adjusted by the State Property Office to reflect any unusual factors.

Finally, the rates and methods of determining these rates may be left as it exists now, each Department controlling its own housing, the employees chosen to live within, and the rates charged for each unit.

The exhibits included at the end of this report are as follows:

Exhibit A: Number of occupied units by departments.

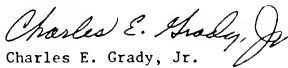

Exhibit B: Counties containing rental sites.

Exhibit C: Summaries of computerized information.

Exhibit D: Actual rental costs by units.

Exhibit E: SMSA rental figures.

Very truly yours,

Charles E. Grady, Jr.

24 CFR Parts 882 and 888

(Docket No. R-83-1029)

Section 8 Housing Assistance Payments Program Fair Market Rent Schedules—Existing Housing and Moderate Rehabilitation

AGENCY: Office of the Assistant Secretary for Housing—Federal Housing Commissioner, HUD.

ACTION: Final rule.

SUMMARY: The United States Housing Act of 1937 requires the Department to publish at least annually Fair Market Rents (FMRs) for its Section 8 housing assistance program. This rule establishes revised FMRs for the Section 8 Existing Housing and Moderate Rehabilitation Programs, including space rentals by owners of manufactured homes. The revised FMR schedules reflect estimated rent levels as of April 1, 1984. These revised rents should ensure that Section 8 participants will continue to have access to an adequate supply of decent, safe, and sanitary housing in all market areas.

EFFECTIVE DATE: October 28, 1983. Retroactive to March 29, 1983 for purposes of calculating the Public Housing Agency earned administrative fee.

FOR FURTHER INFORMATION CONTACT: Gerald J. Benoit, Existing Housing Division, Office of Existing Housing and Moderate Rehabilitation, Department of Housing and Urban Development, 451 7th Street, SW., Washington, D.C. 20410; (202) 755-5333. This is not a toll-free number.

SUPPLEMENTARY INFORMATION:**Background**

Section 8 of the United States Housing Act of 1937 (the Act) (42 U.S.C. 1437(f)) authorizes a housing assistance program to aid lower income families in renting decent, safe, and sanitary housing. This program, which includes housing assistance payments for moderate rehabilitation and existing housing, is administered by PHAs consistent with regulations found in 24 CFR Part 882. Section 8(c)(1) of the Act requires HUD to publish the Fair Market Rents (FMRs) for these programs at least annually in the Federal Register.

The Proposed Rule

On December 13, 1982 (see 47 FR 55784), HUD proposed to change the criteria and procedures for establishing FMRs for the Section 8 Existing Housing and Moderate Rehabilitation Programs (Schedule B) and for manufactured home spaces in the Section 8 Existing Housing Program (Schedule D).

As proposed, the criteria used to determine the appropriate FMRs would have been revised: (1) To reflect 40th percentile rents (i.e., the rent below which 40 percent of the standard quality units are distributed), rather than 50th percentile rents; (2) to exclude new units (units completed in the two years prior to the data survey dates) from the inventory of standard quality units; and (3) to include all rental units rather than only those units rented by recent movers. The Department proposed to continue to use the most recent Annual Housing Survey (AHS) data pertaining to units meeting Section 8 Existing Housing Program standards and to update previously established FMRs by using the Annual Adjustment Factors (AAFs) developed from the residential rent and the fuel and utility components of the Consumer Price Index (CPI).

The Department sought comment on the proposal. We specifically encouraged comments on: (1) The proposed changes in the criteria for establishing the FMR levels and (2) the calculation of the proposed 1983 FMR levels.

In addition to the December 13, 1982, proposed rule, the Department requested comment on an interim rule published on December 15, 1982 (see 47 FR 56133), which continued the FMRs at the 1981 rent levels. The proposed and interim rules both deal with the Fair Market Rent Schedules for the Section 8 Existing Housing and Moderate Rehabilitation programs and space rentals by owners of manufactured homes. Because the comments submitted on the interim rule raised identical issues to those submitted on the proposed rule and because the interim rule will be superseded by this final rule, all comments submitted will be treated together.

A summary of the comments received and the Department's response follows.

Public Comments

The proposed rule requested comments on the proposed criteria for determining FMRs and on the calculation of the rents for particular jurisdictions. In response, HUD received 401 comments from public housing agencies, State and local governments, Members of Congress, Section 8

program administrators, apartment owners and managers, individuals, and organizations of housing officials. Many commenters referred only to the new criteria or the rent calculation, but some covered both the criteria and accuracy of the 40th percentile rent calculations. There were 222 comments on the proposed changes in the FMR criteria; one-third of these included supporting data or narrative discussion. The comments on the accuracy of the rent calculations covered 358 of the 2,774 FMR areas. HUD field offices provided local rental market data and recommended revised rents for an additional 61 FMR areas. Nine comments related to the proposed rents for manufactured home spaces. HUD received fifteen comments on its December 15, 1982, interim rule.

All public comments were reviewed initially by HUD Field Office staff who are familiar with current housing market conditions and trends in the localities within their jurisdictions. Field Office evaluations and recommendations were reviewed by Regional and Headquarters Economic and Market Analysis staff to ensure that all available market data and program guidelines were adequately considered.

To discuss the comments, we have separated them into three categories: A. HUD's proposed new criteria for determining FMRs; B. The calculation of the proposed 1983 FMRs; and C. Miscellaneous comments.

A. HUD's Proposed New Criteria for Determining FMRs

1. Comments received on proposed FMR criteria. As discussed earlier, HUD proposed changing three FMR criteria: all three criteria drew criticism and are discussed below.

Setting FMRs at 40th percentile of standard units. Two hundred twenty-two comments, almost 55 percent of the comments received, opposed the 40th percentile rent standard. Many commenters stated that there are not sufficient units under the 40th percentile rent to run a Section 8 Existing Housing Program.

A frequent comment concerned the effect of tight markets on program operations as the result of the reduced rent standard. Many commenters indicated that the lower standard would not provide enough units to run the program, because units below the 40th percentile rent are the most competitive and have the lowest vacancy rates. The commenters expressed concern that this competition would take away any motivation for the landlord to participate in the program.

About 100 commenters submitted information showing the declining success rate under the current system indicated by Section 8 certificates issued versus units leased. Many commenters stated that they expect this problem to continue.

Another objection to the 40th percentile level was the lack of units meeting HUD's housing quality standards (HQSS). Commenters stated that the number of units available is reduced, because the units do not meet housing quality standards, or the units are marginal and the landlord does not have the incentive or the financial ability to improve the property.

Some commenters felt there was an adequate number of units, but the units were concentrated in traditional areas of low-income housing. These commenters asserted that limiting Section 8 households to such areas or neighborhoods is contrary to one of the major goals of the Section 8 program—to make available to low-income households a broad range of housing opportunities.

Finally, many commenters indicated that the rents at the 40th percentile do not provide an adequate supply of units for larger families. Many stated that the large family units (i.e., three or more bedrooms) are usually detached or semi-detached homes, typically having higher rents.

Including all rental units in the base. HUD's proposal to include in the base all standard rental units, rather than only those rented by recent movers, also drew criticism. Comments uniformly stated that including all units serves to lower rents but does not reflect the actual rents encountered by a tenant seeking to lease an available unit on the market. The rents charged by owners for long-term tenants are lower than rents charged for comparable units rented by new tenants. The commenters argued that a tenant can only lease available units and it is unreasonable to include in the FMR calculation those units occupied by long-term tenants at lower rents.

A related series of comments objected to including public housing in calculating the FMRs. The commenters reasoned that since public housing units are not a source of housing for Section 8 program participants, it is inappropriate to include those units in the base.

Excluding new units. This proposed change drew less criticism than the other two proposed changes to the FMR criteria. Those who did comment felt that excluding from the survey units built within the last two years would skew the rents downward. Removing new units, observed the commenters,

eliminates from the survey those units affected by inflation in the construction industry. On the other hand, a few commenters noted that there had been little new construction within the last two years, so as a practical matter this change in the method of calculating the FMRs would not affect rents.

2. HUD's response to public comment on proposed FMR criteria. The Department has considered carefully all comments and data submitted concerning the proposed criteria. In response, the Department is making the following changes which, taken together, should ensure that sufficient units are available to Section 8 participants.

The Department will set the FMRs at the 45th percentile rent level of standard quality units occupied by recent movers, rather than the 40th percentile of all standard quality units. Additional increases have been provided for the larger (three-bedrooms and larger) bedroom units. Public housing units and units built two years before the survey date will be excluded from the data base.

Increasing the FMRs to the 45th percentile of recent movers increases the choice of units available and relieves competition among certificate holders. Rent levels set at the 45th percentile of recent movers should address the additional concern expressed in the comments that landlords have little or no motivation to continue in the program. It also should relieve the concern expressed in the comments about a lack of mobility of the Section 8 certificate holder by increasing housing opportunities and by permitting greater choice of housing within individual market areas.

The Department agrees that long-term tenancy results in rents that are lower than the rents of comparable units with high turnover rates. For this reason, the Department will continue to base FMRs only on rents for units rented by recent movers. However, fifty percent of the families who receive Section 8 assistance remain in their pre-program unit. Because rents charged by owners for long-term tenants typically are lower than those for new tenants, the previous rent paid by Section 8 participants who lease their pre-program unit (i.e., lease in-place) is a major factor in determining the reasonableness of the rent under the Section 8 Existing Housing Program regulations. In determining rent reasonableness for a family that leases in-place, we anticipate that the PHAs will use, consistent with outstanding requirements, the previous rent paid by the family, plus a modest adjustment—with the resultant contract rents for tenants renting in-place generally being

lower than the rent established for a tenant that moves to a different unit.

The Department will exclude from the rental base all public housing units. HUD makes this change because it agrees with the comments that these units are not a source of housing for Section 8 program participants and also because public housing rents controlled by a statutory rental limitation reflect subsidized rents rather than market rents.

The Department also shares the concern expressed in comments about low rent levels for large units (three or more bedrooms). Data submitted indicate that large families are much less successful in locating units than other program participants. The Department, therefore, is making additional adjustments to the FMRs based on bedroom size for larger units. The FMRs for larger units will be computed as follows. A three-bedroom rent will be 25 percent more than the two-bedroom rent for the jurisdiction, rather than the previous 15 percent, and a four-bedroom unit will be 40 percent more than the two-bedroom base, rather than the previous 30 percent. The FMR for units having more than four bedrooms is calculated by adding 15 percentage points for each additional bedroom. For example, the FMR for a five-bedroom unit is 115 percent of the FMR for a four-bedroom unit.

Finally, the Department will continue to exclude newly constructed units completed in the two years prior to the data survey dates. The Department considered the comments on this point, but has determined that new units generally exceed the non-luxury, modest housing standard of the Section 8 program, and should not be included.

B. The Calculation of the Proposed 1983 Fair Market Rents

1. Comments received on FMR calculations. Many commenters criticized the methodology used by HUD to establish the 40th percentile rents. Specific comments were submitted for 358 market areas, stating that the FMRs for these areas did not reflect the actual 40th percentile rent level.

Commenters stated that HUD has not considered adequately the effect that the annual utility allowance increases have had in effectively reducing the amount available for shelter rent. (Commenters cited actual utility increases as high as 83% in SMSA areas and 33% in non-SMSA areas since 1981.) A corollary suggestion was that HUD determine FMRs to reflect rent, excluding the cost of utilities.

Commenters also criticized reliance on the Annual Housing Survey (AHS) and the Annual Adjustment Factor (AAF) to establish the 1983 rents. Many commenters felt that using data for an entire Census Region to make projections for a particular SMSA fails to take into account important local factors, and results in FMRs that do not represent the actual rental market in the SMSA. Similar comments stated that the projections used by HUD do not provide for local discrepancies such as increases in property taxes, utilities (mentioned above), or water and sewer services rates.

HUD recognizes that local variations are important, and for this reason sought actual market data from commenters. This request drew criticism in several cases. Commenters objected to the request that the data be SMSA-wide. Others objected to the requirement at all, stating that small PHAs simply did not have the resources to collect the type of data required in the time allowed.

2. *HUD's response to public comment on FMR calculations.* The Department uses all available data to calculate the FMRs, including U.S. Census and Annual Housing Survey data. We have concluded that, in general, they are within an acceptable range of accuracy. The best estimates are those developed for the 58 Annual Housing Survey areas. Data limitations and the rapid changes in smaller market areas can result in less accurate FMRs for some areas. This is why the Department encouraged commenters to submit data showing the correct calculation of FMRs for local rental markets, particularly for those FMR areas not covered by the Annual Housing Survey or Consumer Price Index data.

In response to the comments that submitting local survey data is overly burdensome, the Department considers the local rental surveys to be essential to the FMR process and does not view the collection of such data to be an excessive burden on PHAs. Small sample surveys, representative of the range of rental housing types and locations, are accepted as a basis for modifying the FMRs. Where a number of PHAs operate the program within a single FMR area, the Department encourages the PHAs to coordinate their data collection to produce a sample survey that will be representative of the overall market area. In some situations, the rent structure for a PHA jurisdiction may be higher than for the FMR area (SMSA or county) as a whole. The program regulations permit exception rents for localities in a FMR area with

higher rents than the area average. A PHA that believes exception rents are justified for its area should contact the appropriate HUD field office. In this final rule the Department adjusted the proposed rents for the 290 FMR areas where commenters submitted adequate local rental market data to support a change in the FMRs.

The Department also recognizes variations in utility cost increases among Census regions. It is for this reason that the Department specifically requested comments of increasing utility costs and utility allowances in particular jurisdictions. There are no national data available on rents excluding utilities and it is therefore administratively infeasible for the Department to establish separate Fair Market Rents excluding utility costs as suggested by some commenters. In market areas for which data were submitted to demonstrate utility cost increases beyond the level reflected in the CPI data, HUD has increased the FMRs accordingly.

C. Miscellaneous Comments

1. *Proposed FMRs' effect on the PHA administrative fee calculation.* PHA administrative fees are tied to the two-bedroom FMR. Many PHAs commented that the cost of administering the program (e.g., office rent, utilities, salaries, tenant briefing, income verification, apartment search assistance, unit inspections) continues to increase, while the fees remain constant. Many cited the decrease in the success rate of certificate holders leasing units as contributing to increasing the cost of administering the program. Commenters suggested that the cap on administrative fees will result in poor administration, or in some cases, the decision by some PHAs that they cannot continue to operate the program.

The Department believes that the revised FMR schedule published with this rule will provide adequate administrative fees for the PHAs, and will continue to calculate the fees based on the published two-bedroom FMR. In addition, however, the Department currently is evaluating other methods of determining administrative fees that would provide more equitable compensation to the PHAs, based on specific circumstances applicable to individual PHAs.

2. *Proposed FMRs' effect on HUD's Rental Rehabilitation Demonstration Program.* Several commenters raised concerns about the impact of FMRs on the Rental Rehabilitation Demonstration Program administered by HUD. Under the program, participants are expected to deliver at least 80 percent of the

rehabilitated units at rents below the FMRs after rehabilitation. Thus, families who are eligible for Section 8 Existing Housing assistance and who were living in the units selected under the Demonstration may occupy these units. Local officials administering this program are responsible for selecting appropriate buildings and neighborhoods and for developing methods to finance the rehabilitation that ensure that the 80 percent goal is achieved.

The commenters stated that the program, intended to provide impetus to landlords to make repairs to their properties, would not work because the rents to be charged after rehabilitation is completed would exceed the FMRs. The modifications to the criteria for establishing the FMRs included in this final rule should reduce the scope of this problem, to the extent that it exists.

3. *Proposed FMRs create an inequity in rent levels for comparable units within one jurisdiction.* Other commenters raised as a problem the inequity inherent in the Section 8 Program operating with some rents based on the 50th percentile and some rents based on the 45th percentile. A PHA making this comment states that a 1983 certificate holder would be prevented from leasing a unit comparable to units already housing other Section 8 participants.

The Department recognizes that, in reducing the rent standard, some units will no longer be available for the program. Lowering the rent standard effectively reduces a certificate holder's access to units leased at the previous ceiling. This problem is alleviated significantly by the Department adopting in this rule rents determined at the 45th percentile of standard units occupied by recent movers, rather than the proposed 40th percentile. The combination of changes described earlier in the Preamble that the Department has made in response to the comments increases the number of units that will be available to Section 8 Program participants and further ensures the future successful operation of the Section 8 program.

4. *Comment period of sixty days was too short.* A few commenters objected to the "short" 60-day comment period. The Department did not believe that it could allow more time without further delaying the publication of the new FMRs in 1983.

5. *HUD should prepare a regulatory impact analysis and a regulatory flexibility analysis.* One commenter raised the issue of the rulemaking being a "major rule" as defined in the

President's Executive Order on Regulations, E.O. 12291. This same commenter argued that many small proprietorships and other small entities would be effected by the rule, and thus HUD should undertake a regulatory flexibility analysis pursuant to 5 U.S.C. 603(b) of the Regulatory Flexibility Act.

As we concluded in the discussion of these issues later in this Preamble the Department does not believe that either contention is accurate.

The Final Rule

Final Revision of FMR Criteria and FMR Calculations for 1983

Based on an analysis of the public comments and local rental market data provided by commenters and HUD field offices, the Department has made changes to the proposed criteria for establishing the FMRs and is now issuing FMRs for all jurisdictions. The FMRs for the Section 8 Existing Housing and Moderate Rehabilitation Programs (Schedule B) and for manufactured home spaces under the Section 8 existing housing program (Schedule D) are contained in Tables at the end of this document.

The criteria used to calculate these FMRs are based on: (1) 45th percentile rents (i.e., the rent below which 45 percent of the standard units are distributed); and (2) rents based on units rented by recent movers. Public housing units and new units completed during the two years preceding the data survey dates have been excluded from the data base.

The revised 45th percentile FMR schedules for the Section 8 Existing Housing Program (and the base for determining Moderate Rehabilitation FMRs) were developed as follows: (1) The proposed 40th percentile FMR calculations originally published were revised for 290 specific market areas based on local rental market data obtained from public comments; (2) the 45th percentile FMR schedules were calculated for each market area by using the ratio of the 45th percentile rent standard to the 40th percentile rent standard reflected in the most recent AHS data for 58 SMSAs (as previously defined by the Office of Management and Budget) and the 4 Census Regions (including increases based on public comment); and (3) three- and four-bedroom FMRs were adjusted upward to reflect a standard difference of 25 percent and 40 percent, respectively, above the two-bedroom FMR base, instead of the previous 15 percent and 30 percent intervals.

The FMRs for Manufactured Home Spaces (Schedule D) were calculated by

a procedure similar to that used for the Section 8 Existing Housing FMRs: the 45th percentile rent levels for 1983 were calculated for each market area by using the ratio of the 45th percentile rent to the 40th percentile rent based on AHS rents for Manufactured Home Spaces.

Other Matters

On June 27, 1983, the Office of Management and Budget announced revised definitions of the Nation's metropolitan statistical areas (MSAs), which replace the current Standard Metropolitan Statistical Areas (SMSAs) to be effective on June 30, 1983. The Department is implementing these revised definitions for purposes of the Section 8 program effective with this rule. FMRs contained in Schedules B and D are based on OMB's new metropolitan area definitions. Because of the large number of changes in area definitions, we urge you to review carefully the list of MSA definitions contained in the explanatory notes to Schedules B and D.

The Department recognizes that the FMRs of some jurisdictions will be affected by this change, including particularly those jurisdictions no longer in metropolitan areas. In implementing these revisions, the Department is adopting a policy to ensure that no FMR area has lower rents, as a result of revised metropolitan areas, than those published for the area in proposed form on December 13, 1982.

Should a particular jurisdiction believe that there are special circumstances which warrant FMRs higher than the rents published with the final rule, the Department reminds PHAs of procedures available to them to raise contract rents. Under 24 CFR 882.106, a PHA may approve Gross Rents on a unit-by-unit basis (up to 20 percent of its authorized units) which exceed the FMR by up to 10 percent. In addition, the PHA may request that HUD authorize Gross Rents up to 20 percent above the applicable FMR for all units of a given size or type or under different circumstances for a particular neighborhood or rental unit. Please see § 882.106 for more detailed information about requirements for exception rents.

Also in conjunction with OMB's new definition of metropolitan areas, the Department is revising § 882.102 of its regulations. This section currently states that FMRs are established by unit size and two structural categories and that the geographic basis of the FMRs is the SMSA, as defined by OMB. Paragraph (b) is being revised to reflect current agency practice of establishing FMRs for Existing Housing by unit size, and Paragraph (c) is being revised to reflect

the new OMB definition of metropolitan areas.

The Department also is making a technical correction to its definition of Fair Market Rent contained in Part 882. Since this definition also contains the outdated phrase concerning structural categories contained in § 882.102(b) as described above, the Department is amending § 882.102 to conform with agency practice.

The agency has determined that these revisions need not be published as a proposed rule, as generally required by the Administrative Procedure Act (APA), since they merely reflect agency practice, and are thus exempt under section 553(b)(1) of the APA.

A Finding of No Significant Impact with respect to the environment required by the National Environmental Policy Act (42 U.S.C. 4321-4347) is unnecessary since the Section 8 Existing Housing Program is categorically excluded under HUD regulations at 24 CFR 50.21(d).

This rule does not constitute a "major rule" as that term is defined in Section 1(b) of the Executive Order 12291 on Federal Regulation issued on February 17, 1981. Analysis of the rule indicates that it does not: (1) Have an annual effect on the economy of \$100 million or more; (2) cause a major increase in cost or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions; or (3) have a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Pursuant to section 603(b) of the Regulatory Flexibility Act (5 U.S.C. 601) the undersigned hereby certifies that this rule does not have a significant economic impact on a substantial number of small entities because FMRs reflect the rents for similar quality units in an area. Fair Market Rents do not change the rent charged for housing which is not in the Section 8 program, but establishes a ceiling on the rent which may be charged for a unit leased in the program.

This rule was listed as Item H-36-81 under the Office of Housing in the Department's Semi-Annual Agenda of Regulations published on April 25, 1983 (48 FR 18054, 18059) pursuant to Executive Order 12291 and the Regulatory Flexibility Act.

The Catalog of Federal Domestic Assistance program number is 14.156, Lower-Income Housing Assistance Program [Section 8].

at of Subjects

4 CFR Part 882

Grant programs: Housing and community development, Housing, Mobile homes, Rent subsidies.

24 CFR Part 888

Rent subsidies.

Authority: Sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)), sec. 8 U.S. Housing Act of 1937 (42 U.S.C. 1437(f)).

Dated: September 19, 1983.

Philip Abrams,
Assistant Secretary for Housing, Federal
Housing Commissioner.

PARTS 882 AND 888—[AMENDED]

Accordingly, 24 CFR Parts 882 and 888, are amended as follows:

§ 882.102 Amended.

1. In 24 CFR 882.102 the definition for *Fair Market Rent* is amended by removing the words "and types (e.g. elevator, non-elevator)".

2. In 24 CFR 882.102 is revised to read as follows:

882.102 Fair market rents for existing housing.

(a) *Purpose and Applicability.* Schedule B of this part sets forth the Fair Market Rents, as determined by HUD, for the Section 8 Housing Assistance Payments Program for Existing Housing (including the Housing Finance and Development Agencies Program, 24 CFR Part 883). (See 24 CFR 882.102 for the definition of Fair Market Rents.)

(b) *Categories.* These Fair Market Rents are established by unit size (number of bedrooms).

(c) *Geographic Area.* The Fair Market Rents for existing housing are

established for: (1) Each metropolitan area as defined by the Office of Management and Budget and (2) each non-metropolitan county or part of county.

3. Part 888, Subpart A, Schedule B and Schedule D are revised as follows:

Note.—The explanatory notes and Schedules will not appear in the Code of Federal Regulations.

Fair Market Rents for Existing Housing—Schedules B and D—General Explanatory Notes

1. Geographic Coverage

a. FMRs for existing Housing (Schedule B) are established for all Metropolitan Statistical Areas (MSAs), Primary Metropolitan Statistical Areas (PMSAs), nonmetropolitan counties, and county equivalents in the United States, District of Columbia, Puerto Rico, the Virgin Islands, and Guam. FMRs also are established for nonmetropolitan parts of counties in the New England states.

b. FMRs for Manufactured Home spaces (Schedule D) are established for all MSAs, PMSAs, selected nonmetropolitan counties, and the residual nonmetropolitan portion of each state.

2. Constituent Parts of Metropolitan Statistical Areas

a. The current 335 MSAs and PMSAs are those established by the Office of Management and Budget effective June 30, 1983.

b. The constituent counties (and New England towns and cities) included in the current 335 MSAs and PMSAs are identified in the explanatory note following the listing of the FMRs in Schedules B and D. The MSAs are listed in alphabetical order.

3. Calculation of FMRs for Five- or more Bedroom Units

The FMRs for unit sizes larger than four bedrooms shall be calculated by adding 15 percent to the four-bedroom FMR for each additional bedroom. To illustrate, the

calculation of the FMR for a five-bedroom unit would be $1.15 \times 4\text{-BR FMR} = 5\text{-BR FMR}$. The calculation of the FMR for a six-bedroom unit would be 1.30 times the four-bedroom FMR, etc.

4. HUD Policy in Implementing the New Definition of Metropolitan Statistical Areas (MSAs)

In those counties that have been changed from metropolitan to nonmetropolitan FMR area and the 45th percentile FMR calculations for 1983 are lower than the previously proposed 40th percentile FMRs, the previously proposed FMRs are approved for 1983. For each such county, the accompanying rent table contains a parenthetical number which represents the reduction in the accompanying FMR figure which would be appropriate, given the nonmetropolitan status of the county, in the absence of our policy of maintaining FMR levels at no less than the previously proposed (40th percentile) FMRs.

5. Arrangement of the FMR Areas by HUD Regional and Field Office Jurisdictions

The FMRs in Schedules B and D are arranged by HUD Regional and Field Office jurisdictions. The states included in each of the 10 HUD Regional Office jurisdictions are as follows:

- (a) Boston—Maine, Massachusetts, Vermont, New Hampshire, Rhode Island, Connecticut.
- (b) New York—New York, New Jersey, Puerto Rico, Virgin Islands.
- (c) Philadelphia—Maryland, Pennsylvania, Delaware, West Virginia, Virginia, District of Columbia.
- (d) Atlanta—Georgia, Alabama, South Carolina, North Carolina, Mississippi, Florida, Kentucky, Tennessee.
- (e) Chicago—Illinois, Ohio, Michigan, Indiana, Wisconsin, Minnesota.
- (f) Fort Worth—New Mexico, Texas, Arkansas, Louisiana, Oklahoma.
- (g) Kansas City—Missouri, Kansas, Iowa, Nebraska.
- (h) Denver—Wyoming, Colorado, North Dakota, Montana, Utah, South Dakota.
- (i) San Francisco—Hawaii, California, Arizona, Nevada, Guam.
- (j) Seattle—Alaska, Idaho, Oregon, Washington.

Mr. Charles Holliday
Assistant Director
Office of State Property
Department of Administration
Administration Building
Raleigh, N. C. 27611

Dear Mr. Holliday:

Thank you for your Department's contribution to the work of the Legislative Research Commission's Study Committee on State-owned Rental Housing. Because of your contribution the Committee was able to identify, during the April 10, 1984 meeting, the Departments of Agriculture, Community Colleges, Correction, Cultural Resources, Higher Education (UNC), Human Resources, Natural Resources and Community Development and Transportation as owners of rental housing.

The Committee would be most appreciative if you would review your files to verify that all Departments owning rental housing have been identified. Additionally, your attendance at the Committee's upcoming May 11, 1984 meeting (Room 1425, State Legislative Building, 10:30 a.m.) would be most helpful in order that you might assist the Committee as it develops its recommendations to the 1984 General Assembly.

Thank you again for your assistance and I hope to see you Friday.

Sincerely,

A handwritten signature in cursive script, appearing to read "E. Ann Christian".

MEMORANDUM

TO: Ann Christian
Legislative Services Office

FROM: Maurice A. Weaver *MAW*
Budget Officer

SUBJECT: State-Owned Rental Housing

The Attached material is provided as this agency's recommendation on the disposition of non-essential Rental housing.

RESEARCH STATIONS: Rental housing on the several research stations has been listed in one of three categories: Essential, Essential Short-term and Non-essential. Housing considered essential should be retained to provide on-farm residences for employees critical to various research projects. For the most part, such employees tend livestock and dairy animals which require attention daily, and often during non-work hours. Essential short-term denotes those dwellings occupied by employees who are not required to reside on the station, and will be sold when vacated. Vacancies will occur upon the employee leaving station employment or upon his death.

Departmental policy does not permit the commitment of additional state resources to essential short-term housing. Consequently, as these dwellings deteriorate, many employees will find it desirable to move into privately owned dwellings, at which time the vacant state-owned house will be sold.

Non-essential housing will be sold through the state's surplus property agency for removal or demolition.

STATE FARMS: All housing on the several state farms has been declared non-essential with the exception of one dwelling at the Cherry Farm Unit. This house located at 413 Farm Circle Drive will be used as the farm office. All remaining houses are scheduled for sale and removal from state property by December 31, 1984

Page 2
April 19, 1984

STATE FAIR: Only two dwellings are controlled by the State Fair. One is located on the grounds near the Youth Center and occupied by a part-time employee who serves as caretaker. The security provided by this individual living on the grounds is quite valuable. If the equivalent security was provided by professional security personnel, the cost would exceed \$18,000 annually. The second dwelling is located across Trinity Rd., east of Carter-Finley Stadium. Although occupied by another State Fair employee, this house is not considered essential. As soon as other housing can be acquired by the employee, the house will be sold for removal from state property. Sale and removal of the house is scheduled to be completed by December 31, 1984.

If you have questions, please contact me at 733-7314.

Legislative Services Office
Legislative Drafting Division
2129 State Legislative Building
Raleigh, North Carolina 27611

Dear Ms. Christian:

The Department of Community Colleges does not own any rental property and does not anticipate ever being in the rental business. Some of the institutions of the system do own homes for their presidents but these are strictly through the Boards of Trustees. We, therefore, do not have anything to report on this matter.

If we can offer any additional information, please contact me.

Sincerely,

A handwritten signature in dark ink, appearing to read "T. King", written over a horizontal line.

MEMORANDUM

TO: E. Ann Christian
Committee Counsel

FROM: T. S. Ryon, Jr. *T. S. Ryon, Jr.*
Deputy Secretary

RE: N. C. Department of Correction Owned Rental Housing

I have reviewed the data supplied by the Department of Administration regarding the rental property owned by the Department of Correction. The Department feels that the only unit which can be designated as "nonessential" is the house in Wadesboro. This house has been used as a unit storage building for at least the last ten years. Thus, the Department has converted it to another appropriate use. The Department feels that the remaining units are essential (that is, on a cost/benefit basis in the Department's best interest to maintain). Having employees living at each unit is in the best interest of the Department, however, because of the cost of new construction it would not be cost justified to provide new housing throughout the system. We do feel that the current rental property should be maintained by the Department and that the rates should reflect the benefits to the Department of having staff living at the unit and thus readily available when needed. In addition, two of the houses at Caledonia and one at Odom are occupied by employees of Correctional Enterprises which operate the farms at these units. It is essential that we have farm employees always available to deal with the many problems of such a large operation.

If it is determined that these houses should be sold, then the Department feels that these houses must be moved only after determining that an appropriate alternative use cannot be found.

As you can readily see, the Department feels very strongly that maintaining these houses as rental units at the existing rental rates is in the best interest of the Department of Correction and the State of North Carolina.

If I can provide any additional information, please advise.

in State-owned Rental Property
2129 State Legislature Building
Raleigh, NC 27611

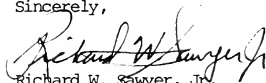

Dear Ms. Christian:

It was my pleasure to appear before the Commission on April 10, 1984. As I stated at my appearance, I wish we could get out of the rental business but due to the value of our Collections at the State Historic Sites, we feel it of great importance that we continue to have these rental houses.

We are in the process of disposing of our rental property at Historic Halifax. We feel that this house was not essential, so we have decided to sell it and have it moved from the property.

Should you have other questions, please call me.

Sincerely,

SUBJECT: Comments made by David Hayes, Assistant Secretary for Management
on April 10, 1984 before the Legislative Research Commission's
Committee on State-owned Rental Property

Mr. Chairman, Members of the Committee - When I came to this meeting
I was ready to state that the Department of Transportation does not
own houses which are rented to employees.

I have just had an opportunity to review the study by the Department
of Administration which lists Departments which have rental housing. The
report confirms my information, we don't have such property.

Senator Dallas L. Alford, Jr., Co-Chairman
Representative George W. Brannan, Co-Chairman
LRC Committee on State-Owned Rental Housing
2129 State Legislative Building
Raleigh, North Carolina 27611

Dear Senator Alford and Representative Brannan:

This information describes our perspective on the use of state-owned housing and the "essential" and "desirable" aspects of its availability to our staff.

In past years, three conditions existed in the Department of Human Resources that were pertinent to this issue:

1. staffing levels were less than adequate and we had a true need for off-duty employees to be close by in the event of an emergency,
2. pay levels for certain classifications were too low, and the benefit of low-cost housing partially offset the less competitive wages we had to offer, and
3. houseparents that lived in the dorms occupied by students were the only staff available to supervise the children at night.

Currently, staffing levels are consistent with ratios associated with psychiatric hospitals, MR centers, and our school programs. The Office of State Personnel no longer factors housing benefits into the compensation package for our staff. And we now assign staff to student residences at night, rather than depend on staff living in the same building.

Therefore, we conclude that it is not essential for any staff occupying state-owned quarters to live on campus for operation of the facility. It was noted in our presentation to your committee on April 10 that 13 DHR campuses do not even have state-owned housing for staff.

Senator Dallas L. Alford, Jr.
Representative George W. Brannan
April 16, 1984
Page 2

It must be recognized that it can be desirable for this practice to continue in some places for the following reasons:

1. it is recruiting tool for staff, particularly physicians and nurses, in the psychiatric hospitals,
2. it does allow a quicker response time for maintenance personnel when they are called back for an emergency, and
3. the availability of additional staff is of value, especially at night in the dorms in our schools, whenever a child gets sick or is injured.

Many of the houses and apartments we rent are getting in poor shape. The rental rates now being collected are inadequate to regularly replace roofs, furnaces, water heaters, etc. Our regular campus buildings that house patients and program space also need substantial maintenance time, and employee housing can reduce available maintenance staff time for regular buildings.

In recent years DHR has demolished, sold, or renovated for campus use many of these residences. We would like to continue this in an orderly fashion.

Sincerely,

Jim Woodall, Director
Budget and Analysis

TO: E. Ann Christian, Counsel
LRC Committee on State-Owned Rental Housing

FROM: Jim Woodall, Director
Budget and Analysis *Jim Woodall*

SUBJECT: State-Owned Housing in DHR

The following is additional information on housing that is desirable to maintain on our campuses:

Training Schools - all units are desirable, three each at Samarkand, Dobbs, and Jackson; eight at the J.E.C.

Schools for the Deaf - all units are desirable (apartments)

Psychiatric Hospitals - at Broughton Hospital, twenty houses on the main campus are desirable to continue, plus four multiple-occupancy units; at Umstead Hospital, apartments for psychiatric residents and the nurses' dorm are desirable to continue; at Dix Hospital, twenty-eight houses on the East Campus should be maintained for physicians and senior staff; at Cherry Hospital, ten housing units of brick construction are desired for senior medical staff.

The houses and apartments not included above can be sacrificed without disruption of the campus responsibilities. If the Committee chooses to do this, our policy would be to sell the property or to use the property for campus activities. If neither idea seemed practical, then we would demolish the structure as we occasionally have when a dilapidated residence was evacuated.

All of the above steps would occur as attrition caused the dwellings to become vacant. We would not evict any employees.

J/7

DIVISION OF PARKS AND RECREATIONSTAFF RENTAL HOUSINGBackground:

It has been a procedure from the beginning of the development of the State Park System to provide rental housing for the Ranger staff operating and maintaining each park and recreation area. This practice has been essential for the adequate protection of the natural resources, protection of the park visitors and to protect facilities and equipment. This has been a successful practice and a wise investment for the State.

The rental fee has been based primarily on the need to maintain these housing units. Currently, \$20,000 - \$25,000 is collected in rent and the same amount is spent maintaining the units. Most of the units have been built by the State as new houses and a few of the houses have been acquired with the acquisition of park properties. Nonessential housing has not been acquired.

The State Park System has 53 housing units being rented to staff in 22 park areas. Four housing units have been converted into park offices and three smaller cabin size units will be renovated as vacation cabins. At the present time there are no nonessential rental houses in the State Park System.

Security Needs:

Most State Park and Recreation Areas have buildings and equipment that require security. Examples would be the park office with office equipment; workshop with maintenance tools and equipment; vehicle garage with automotive equipment, tools and supplies; warehouse with janitorial supplies; etc.

The State has a considerable investment in each of these developed areas and security is needed to prevent vandalism and major breakins.

Other Benefits:

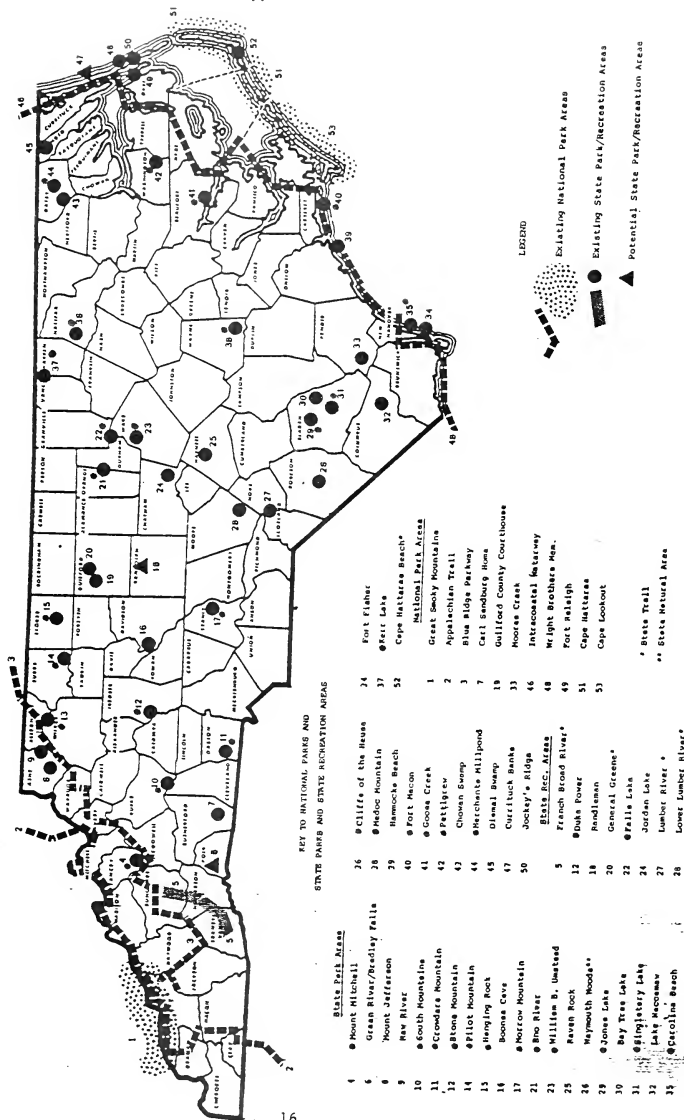

The park staff living in the park and recreation areas provide additional benefits to the State. Some of these benefits are as follows:

1. Fire prevention and fire protection for the natural resources and facilities within the park.
2. Staff presence greatly reduces vandalism and major crimes during off duty hours.
3. Park visitors that camp or stay in cabins need access to staff during off hours when the park is closed. Examples: emergency phone calls, sick children, heart attacks, etc.
4. Staff needs to be available when utility breakdowns and other problems occur. Examples: break in water line and campers have no water, power goes off in cabins and frozen foods are melting, etc.
5. Staff is available for accidents that require medical service such as cuts, falls, snake bites, etc. that occur during off duty hours to campers and cabin users.
6. Staff living in the park but off duty can be called to help with lost park visitors, fight forest fires, search for down planes, help with storm damages, etc.

- B: Modern 4 or 5 Rooms
- C: Modern 3 Rooms or Less
- D: Not Modern 3 Rooms or Less and Trailers

Deductions for salary grades 62 and 66 will be determined by where the salary falls within the salary classes above.

DIVISION OF FOREST RESOURCES
RENTAL HOUSING

Pursuant to your request for information on rental houses, the Division of Forest Resources currently has 41. This is a reduction from an original number of 86. Several of the 41 have been identified for elimination in the near future.

It is our policy to continue the elimination of houses that don't contribute significantly to the operation of the Division. The two primary criteria used in this assessment are fire readiness and security.

In many of the remote areas of the state having a Forest Fire Equipment Operator or Ranger living at a headquarters or equipment storage area has provided an improved fire reporting system for the public and quicker response by our people to the fires. With countywide emergency communications networks developing across the state, this justification has decreased in many areas, but remains viable in others.

The Division also has numerous sites statewide where vehicles, forest fire equipment, nursery equipment and operations and state forest equipment are located. Vandalism and theft occur intermittently at some of these sites, with a lesser amount at the locations with dwellings than at those without.

The elimination of houses has occurred not only where the need was reduced but also where some of the houses have deteriorated to the point that the maintenance cost has become prohibitive. This is an increasing problem since many of these houses were built during the CCC era, 40 to 50 years ago.

Since some of these houses have been occupied for many years by an employee who has contributed considerably to the upkeep and care of the structure, the Division has requested through the Department an allowance for these individuals to buy the houses at market value as they become surplus to our needs and move them to another location. We have not, however, been able to receive approval for this except through the normal bidding process.

If you need more specific information on the individual houses and related circumstances at this time, please let us know.

Raleigh, North Carolina 27611

Dear Ms. Christian:

In response to your request of April 13, 1984, we asked the constituent institutions to review their questionnaire responses to the recent Department of Administration, State Property Office's survey on State-owned rental property and to indicate any facilities viewed by the institution as nonessential in terms of the criteria specified in Section 2, Chapter 905 of the 1983 Session Laws.

In the context of the specified criteria, two facilities were classified by the institutions as nonessential at this time. The institution is in the process of disposing of both properties identified below.

The University of North Carolina at Chapel Hill

1. House and lot; 425 West Cameron Avenue, Chapel Hill
(State Property Office Asset #147)
2. House and lot; 427 West Cameron Avenue, Chapel Hill
(State Property Office Asset #148)

Five facilities were designated as essential for a limited, although undetermined, length of time. These properties, which are identified below, either involve a commitment to the present occupant, or the present use of the property will be terminated when it is needed for campus expansion or other institutional use.

Appalachian State University

1. House; 417 Stansbury Circle
(State Property Office Asset #97)

North Carolina State University

1. Research Unit #5; Farm house (State Property Office Asset #1)
2. Research Unit #5; Farm house (State Property Office Asset #3)
3. Research Unit #1; Farm house (State Property Office Asset #4)

North Carolina Central University

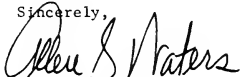

1. House; 523 Nelson Street (State Property Office Asset #41)

Ms. E. Ann Christian

A more extensive review of the State Property Office's survey information would be required before The University could make a more complete evaluation of the data, provide specific comments and representations, and make a reconciliation of the data provided with University records.

If additional information is needed, please let me know.

Sincerely,

A handwritten signature in dark ink, appearing to read "Allen S. Waters". The signature is fluid and cursive, with the first name "Allen" and last name "Waters" clearly distinguishable.

Senator Dallas L. Alford, Jr., Co-Chairman
Representative George W. Brannan, Co-Chairman
LRC Committee on State-Owned Rental Housing
2129 State Legislative Building
Raleigh, North Carolina 27611

Dear Senator Alford and Representative Brannan:

As discussed in the Legislative Research Committee on Friday, May 11, 1984, the Department of Human Resources will dispose of unnecessary housing according to the alternatives as presented in Chapter 905 of the 1983 Session Laws.

Of the 161 rental housing units declared unnecessary, 122 will be sold for removal from the lot, and 39 will be converted to other uses. From the time the original count of rental housing units was accomplished, this Department has continued its policy disposing of or converting unnecessary housing to other uses. As a result of this, many of these housing units have already been offered for sale, and consequently may be sold, also many have already been converted to other uses.

Thank you for the opportunity to be a part of the State-Owned Rental Housing study, we appreciate your assistance in this matter.

Sincerely,

A handwritten signature in cursive script, reading "Jim Woodall".
